AHFM Total Return Fund (the 'Fund'),

a sub-fund of GemCap Investment Funds (Ireland) PLC (the 'Company')

The Fund is managed by Gemini Capital Management (Ireland) Limited which acts as manager to the Company

Objectives and Investment Policy

The investment objective of the Fund is to generate positive returns in most market conditions over any given three-year period. There is, however, no guarantee that the Fund will achieve its investment objective.

The Fund is actively managed and whilst it seeks to outperform the IA Targeted Absolute Return sector, it is managed without reference to any benchmark meaning that the Investment Manager has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies.

In order to seek to achieve its investment objective, the Fund will invest in a portfolio of equity securities, such as common stock and preferred stock, which will be listed or traded on Recognised Exchanges and may be contained in an eligible financial index. It will also invest in fixed income securities, such as G20 government bonds and investment grade corporate bonds, convertible securities, such as preference shares and convertible bonds. Convertible securities may embed financial derivative instruments ("FDI") and/or leverage.

Investments may also take the form of

- cash and money market instruments such as deposits/certificates of deposit, money market funds, treasury bills, commercial paper;
- regulated collective investment schemes, including exchange-traded funds ("ETFs") which may include any of the Asset Classes as underlying assets. No investment will be made in another Fund of the Company; and
- financial derivative instruments ("FDI") (as detailed further below).

While the Fund is not subject to any industry sector, market capitalisation or geographical constraints on target investments, it may invest in sectors such as financials, technology and healthcare. In addition, the Fund may invest up to 50% of its Net Asset Value in emerging markets, although

under normal market conditions it is intended that investment in emerging markets will not exceed 20% of the Fund's Net Asset Value.

The target exposures are that:

- the exposure of the Fund to collective investment schemes (including ETFs) may be between 0% and 10% of the Net Asset Value of the Fund; and
- the exposure of the Fund to cash and money market instruments may be between 0% and 30% of the Net Asset Value of the Fund.

The Fund may, however, have an exposure outside of the above targets at times (for example due to market conditions or market movements).

For any Asset Class which does not have a target exposure listed above, the Fund may be invested up to 100% of its Net Asset Value.

The Fund may utilise FDI for investment, hedging or efficient portfolio management purposes subject to the limits and conditions imposed by the Central Bank, as set out in section 6 (Efficient Portfolio Management) of the Prospectus. The FDI used may be exchange-traded or over-the-counter ("OTC"), and deliverable or non-deliverable, provided that the Fund may only utilise FDI which are provided for in the Fund's risk management policy once cleared by the Central Bank. The underlying to the FDI will comprise assets consistent with the investment policy of the Fund.

You can buy and sell your shares in the Fund on every business day on which banks in Ireland and the United Kingdom are open for normal banking business. Income and gains in this share class will be accumulated and reinvested on behalf of shareholders.
