In pursuing its investment objective, the Fund will be exposed to additional risks including without limitation:

> there may be insufficient buyers or sellers to allow the Fund to sell or buy certain types of securities readily;

> Convertibles expose the Fund to the risk the issuer of the debt security portion of the security may fail to meet its obligations as well as the performance of the underlying stock into which it can be converted;

> investments in emerging markets may expose the Fund to more social, political, regulatory and currency risks than securities in developed markets;

> Derivatives may fluctuate in value rapidly and certain derivatives may introduce leverage which may result in losses that are greater than the original amount invested;

> a party with whom the Fund contracts for securities may fail to meet its obligations or become bankrupt which may expose the Fund to a financial loss; and

> Structured Notes expose the Fund to the market risk of the underlying security and Counterparty Risk.

For a more detailed explanation of the risks, please refer to the 'Risk Warnings' section of the Prospectus and the Supplement.

For non-US Dollar classes, while the Fund may attempt to hedge against currency fluctuations, there can be no guarantee that the value of such classes will not be affected by the fluctuations in the US Dollar against the relevant currency.
