Objectives and Investment Policy

Investment Objective

The investment objective of the Fund is to seek to achieve a positive return in all market conditions over a 3 year period.

The Fund is considered to be actively managed in reference to the 3 month British Pound sterling LIBOR rate and the MSCI World Index (the "Benchmarks") by virtue of the fact that it uses the 3 month British Pound Sterling LIBOR rate for performance comparison purposes and the MSCI World Index as the reference index for the purposes of calculating the global exposure of the Fund using the Relative VaR methodology. The Fund will use the relative VaR approach whereby the VaR of the Fund shall not exceed twice the VaR of the MSCI World Index. However the Benchmarks are not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmarks

Investment Policy

The Fund expects to achieve the investment objective through the allocation of investments across four main asset classes. **Equities**, which are stocks or other forms of securities which represent an ownership interest, such as shares in a company. **Foreign Exchange**, the Fund may invest in securities denominated in a wide range of currencies. **Fixed Income securities** which are a form of investment for which the Fund shall receive real rates of return or periodic income such as bonds. **Alternatives**, being non-traditional assets that are not equities, fixed income securities or cash, such as financial indices or other forms of collective investment schemes.

The Investment Manager will select the specific types of investment from the asset classes by conducting market research in respect of the prices of the securities and the volatility within the market.

The minimum exposure the Fund may have to equities is -40% of its Net Asset Value ('NAV') and the maximum is 70% of its NAV.

The minimum exposure to government bonds is -100% of its NAV and the maximum being 100% of its NAV.

The Fund may allocate up to 100% of its NAV in other eligible collective investment schemes.

In addition, the Fund may use certain financial derivative instruments such as swaps, being an agreement between the Fund and a counterparty to exchange one stream of cash flows against another, futures, options and forwards being agreements to buy and sell assets for a specified price at a specified point in time, or participation notes.

The Fund may be managed to operate in normal circumstances within a gross range of 50%-150% long exposure and -50% and 150% net exposure. The Fund may be leveraged up to 200% of its NAV.

The Company may, at its discretion, declare dividends on any Class in the Fund at such intervals as shall be determined by the Company, and notified to Shareholders at that time. Dividends will be paid by electronic transfer within two months thereafter.
