Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Class A4 (USD Institutional Accumulation) Shares (ISIN IE00B6WFK718)

Third Avenue Real Estate Value Fund (the 'Fund'), a sub-fund of GemCap Investment Funds (Ireland) PLC (the 'Company')

The Fund is managed by Gemini Capital Management (Ireland) Limited which acts as manager to the Company

Objectives and Investment Policy

The Fund seeks to achieve long-term capital appreciation, primarily through investment in shares in companies.

The Fund is considered to be actively managed in reference to the Solactive GBS Developed Markets Investable Universe Property

USD Index TR (the "Benchmark") by virtue of the fact that it uses the Benchmark for performance comparison purposes. However the Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmark.

The Fund seeks to achieve its objective by investing its assets primarily in securities of real estate and real estate-related companies, or in companies which own significant real estate assets at the time of investment or in real estate investment trusts ('real estate companies').

These securities will primarily be equity securities (which may include both common and preferred stocks, and convertible securities) of well-financed real estate companies (meaning companies believed to be without significant liabilities in comparison to their liquid resources).

The Fund seeks to acquire these securities at a discount to what the investment manager believes is their true value.

The Fund may also invest a portion of its assets in debt securities (which may include high-yield, distressed and mortgage-backed securities) of real estate companies that the investment manager believes have above-average yield potential.Exchange traded and over the counter derivatives may be used for investment, hedging or efficient portfolio management purposes.

Please refer to the Fund's supplement ('FDI' section) for more details.

You should view your investment as medium-term to long-term.

Recommendation: This Fund may not be appropriate for short-term investment.

You can buy or sell your shares in the Fund every weekday on which both the New York Stock Exchange and banks in Ireland are open for business.

The Fund will not distribute any dividends in this share class. Income and gains of this share class will be accumulated and reinvested on behalf of shareholders.

For full details please refer to the 'Investment Objective and Policy', 'Issue of Shares' and 'Redemption and Switching of Shares' sections of the Supplement and 'The Shares' section of the Prospectus.

Risk and Reward Profile

lower potential risk/rewards *higher potential risk/rewards*

The indicator above illustrates the position of this Fund on a standard risk/ reward category scale. This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean investment is 'risk free'. This indicator is not a measure of the risk that you may lose the amount you have invested.

The Fund is in category 6 because of the high range and frequency of price movements of the underlying investments.

The following are risks materially relevant to the Fund which are not adequately captured by the indicator:

In addition to general market conditions, the value of the Fund will be affected by the strength of the real estate markets. Factors that could affect the value of the Fund's holdings are set out in the Supplement.

The value of bonds is likely to decrease if interest rates rise and vice versa and below investment grade securities expose the Fund to greater risk than investment grade securities.

The Fund intends to find value in industries that the investment manager believes to be temporarily depressed. The prices of securities in these industries may tend to go down more than those of companies in other industries.

Due to the Fund's investment policy, the Fund may at times have a significant cash position which may impact on Fund performance in certain market conditions and may make it more difficult for the Fund to achieve its investment objective.

The Fund may use derivatives to try to reduce the overall risk of its investments or reduce the cost of investing, although this may not be achieved.

Adverse movements in exchange rates could result in a loss to the Fund.

A more detailed description of the risk factors applicable to the Fund is set out in the 'RISK FACTORS' section in the Prospectus and Supplement.
