Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Class C Accumulation (USD) Shares ISIN (IE000M2D28V2)
Third Avenue Global Value Fund (the 'Fund'),
a sub-fund of GemCap Investment Funds (Ireland) PLC (the 'Company')

The Fund is managed by Ascender Fund Partners (Ireland) Limited which acts as manager to the Company

Objectives and Investment Policy

The investment objective of the Fund is to achieve long-term capital appreciation, primarily through investment in equities.

The Fund is considered to be actively managed in reference to the Solactive GBS Developed Markets Large and Mid Cap USD Index TR (the "Benchmark") by virtue of the fact that it uses the Benchmark for performance comparison purposes. However, the Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmark.

The Fund seeks to achieve its objective mainly by acquiring common stocks of well-financed companies (meaning companies with limited indebtedness and with significant liquid resources relative to the Investment Manager's analysis of their liabilities) at a discount to the Investment Manager's estimate of intrinsic value (as further detailed in the "Investment Manager Philosophy" section of the Supplement). The Fund may invest up to 10% of its Net Asset Value in senior securities, such as preferred stocks and debt instruments, including government and/or corporate bonds or notes which are fixed or floating and may be below investment grade, debentures, and high yield or distressed securities (e.g. securities issued by companies that are, or might be, involved in reorganisations or financial restructurings, either out of court or in bankruptcy) that the Investment Manager believes are undervalued.

When the Investment Manager believes that a temporary defensive posture is appropriate, or there appears to be a lack of suitable opportunities that meet the Fund's investment criteria, the Fund may hold all or a portion of its assets in short-term and/or sovereign instruments, such as treasuries, cash or cash equivalents including US or other government agency securities and money market funds. This does not constitute a change in the Fund's investment objective, but could prevent or delay the Fund from achieving its objective.

Principally, the Fund will invest in companies listed or traded on a regulated stock exchange or market set out in Appendix A of the Prospectus. The Fund may also invest in unlisted securities in accordance with the UCITS Regulations.

The Fund invests in companies regardless of market capitalisation or geographic location. The Fund may also invest up to 20% of its Net Asset Value in emerging markets, which may lead to increased volatility.

Exchange traded and over the counter derivatives may be used for investment, hedging or efficient portfolio management purposes. Transactions in such instruments (referred to as financial derivative instruments or "FDIs") may leverage the Fund due to the leverage inherent in such instruments. This may result in a higher level of volatility than would be the case if the Fund did not utilise FDIs. Please refer to the "FDI" section of the Fund's supplement for more details.

The Fund may be appropriate for investors seeking long-term capital appreciation and who are prepared to accept, in normal market conditions, a medium degree of volatility of the Net Asset Value per annum. You can buy or sell your shares in the Fund every weekday on which both the New York Stock Exchange and banks in Ireland are open for business. The Fund will not distribute any dividends in this share class. Income and gains of this share class will be accumulated and reinvested on behalf of shareholders. For full details please refer to the 'Investment Objective and Policy', 'Issue of Shares' and 'Redemption and Switching of Shares' sections of the Supplement and 'The Shares' section of the Prospectus.

Risk and Reward Profile

lower potential risk/rewards *higher potential risk/rewards*

The indicator above illustrates the position of this Fund on a standard risk/ reward category scale. This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean investment is 'risk free'. This indicator is not a measure of the risk that you may lose the amount you have invested.

The Fund is in category 6 because of the high range and frequency of price movements of the underlying investments.

The following are risks materially relevant to the Fund which are not adequately captured by the indicator:

Style Risk:

The Fund intends to find value in industries that appear to be suffering from temporary difficulties and which it believes to be presently out-of-favor. The prices of securities in these industries may tend to go down more than those of companies in other industries. As a result of the implementation of the Fund's investment policies, there may be times when the Fund will have a significant cash position. A substantial cash position can impact Fund performance in certain market conditions, and may make it more difficult for the Fund to achieve its investment objective.

High-Yield Risk and Distressed Risk:

The Fund's investments in high-yield securities (commonly known as "junk bonds") may expose the Fund to greater risks than if the Fund only owned higher-grade securities. The value of high-yield, lower quality securities is affected by the creditworthiness of the issuers of the securities and by general economic and specific industry conditions.

The Fund may also invest in distressed securities, which the Investment Manager considers to be issued by companies that are, or might be, involved in reorganisations or financial restructurings, either out of court or in bankruptcy. The Fund's investments in distressed securities would typically involve the purchase of high-yield bonds or other indebtedness of such companies.

A more detailed description of the risk factors applicable to the Fund is set out in the 'RISK FACTORS' section in the Prospectus and Supplement.
