Recommendation: The Fund is suitable for investors that have a moderate to high risk tolerance, long-term time horizon, and must be able to accept temporary capital losses due to the potentially volatile nature of the underlying assets, therefore, investment in the Fund may not be appropriate for investors planning to withdraw their money within 3 to 5 years.

We have classified this product as 4 out of 7, which is an average risk class. The minimum investment per investor is USD 2,500. The Fund has a long-term investment policy and is not intended for investors who will need access to their investment before the end of the recommended holding period of 3 years.

The scenarios shown illustrate how your investment could perform. This share class was launched recently and therefore no past performance data is available.
The scenarios presented are an estimate of future performance based on proxies of similar products, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. The figures shown include all the costs of the product itself, but may not include all the costs you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if the manager is unable to pay out?

As a shareholder in the Fund, you would face a financial loss in the event of a default of the Fund. The sub-fund is not a guaranteed UCITS and as a result there is no guarantee scheme in place which provides a guaranteed rate of return.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for two different holding periods. They include potential early exit penalties. The figures assume you invest USD 10,000. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.
